Shing Player Maine: 34 Registered: 2012-07-22 Posts: 92 Not sure if it is related to windows or not... I reinserted the W10 with the latest Creators update and the game won't even start... There is a black screen for 3-4 seconds and then it closes without messages. The only other thing that has changed is my video card, but I don't really have a problem with other old games. Drivers are updated, I tried compatibility modes and other customers... Nothing works, no ideas? Does anyone use the latest Win10 or Geforce 1000 series card? Does it work for you? Thanks for the answers. No, no, no DinkW Member Reputation: 986 Location: Front of screen Registered: 2012-08-06 Posts: 1,708 Website Hi I can confirm the running of the game in the Win10 Creators update. Was this a complete window reinstallation or just an update and did it work before the upgrade in the standard version of Windows 10? Have you activated a hidden administrator account in Windows 10? Shing Player Maine: 34 Registered: 2012-07-22 Posts: 92 Oh, it finally works... Thanks for the tips guys, I had to turn on DirectPlay.
